**SECTION 3: HAZARDS IDENTIFICATION**

**Primary Route of Entry:** No specific information is available for this product. Although, this product opposes only slight irritation concern with all routes of entry.

**Eyes:** No specific information available. Contains materials that are essentially nonirritating, but contact may cause slight transient irritation.
GeLavish Gel Polish

Skin: No specific information available. Contains materials that may cause moderate skin injury (reddening and swelling) and/or sensitization. Prolonged contact may cause blister formation (burns). Since irritation may not occur immediately, contact may go unnoticed.

Ingestion: No specific information available. Contains materials that may be practically nontoxic.

Inhalation: No specific information available. Low volatility makes vapor inhalation unlikely.

Sub-Chronic Effects: No specific information available. Limited tests showed no evidence of teratogenicity in animals. A lifetime skin painting study with mice showed no evidence of carcinogenicity.

NOTE: Refer to Section 11, toxicological information for Details

SECTION 4: FIRST AID MEASURES

First Aid for Eye: Flush with plenty of water for 15 minutes and retract eyelids often. Seek medical attention immediately.

First Aid for Skin: Remove contaminated clothing and wash contact area with soap and water for 15 minutes.

First Aid for Ingestion: If appreciable quantities are swallowed, seek medical attention.

First Aid for Inhalation: In case of exposure to a high concentration of vapor or mist, remove person to fresh air. If breathing has stopped, administer artificial respiration and seek medical attention.

SECTION 5: FIRE-FIGHTING MEASURES

Flash Point (°F/°C) | Flammable Limit (vol %) | Auto-ignition Temperature (vol %)
---|---|---
>73°F/23°C | Setaflash | No Data | No Data

Method:

Extinguishing Media: Use carbon dioxide or dry chemical for small fires: aqueous foam or water for large fires.

Fire Fighting Instructions: Remove all ignition sources. Wear self-contained breathing apparatus and complete personal protective equipment when entering confined areas where potential for exposure to vapors or products of combustion exists.

Unusual Hazards: High temperatures and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers. Avoid the use of a stream of water to control fires since frothing may occur.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Spill or Release Procedures: Spontaneous polymerization can occur. Eliminate ignition sources. Use eye and skin protection. Place leaking containers in a well ventilated area. Dike and recover large spills. Soap up small spills with inert solids (such as vermiculite, clay) and sweep/shovel into disposal container. Wash spill area with strong detergent and water solution; rinse with water, but minimize water use during clean-up. Do not flush to sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (80) 424-8802. EU Regulations require the consultation of Directive 98/24/EC. Dispose and report per regulatory requirements if necessary. Please prevent washings from entering waterways.

SECTION 7: HANDLING AND STORAGE

Handling: Avoid contact with skin and eyes. Avoid breathing vapor. Keep container closed when not in use. Avoid prolonged exposure to light. Remove all contaminated clothing, shoes, belts and other leather goods immediately. Incinerate leather goods (including shoes). Wash contaminated clothing thoroughly before reuse. Wash skin thoroughly with soap and water after handling. Solvents should not be used to clean skin because of increased penetration potential.

Most acrylic monomers have low viscosities, thus only needing room temperature conditions to facilitate proper pouring techniques. However, viscous type gels such as these may require heating to facilitate proper pouring techniques. To ensure that this happens, product may be heated to 60°C/140°F for not more than 24 hours. Do NOT use localized heat sources such as band heaters to heat/melt product. Do NOT use steam. Hot boxes or hot rooms are recommended for heating/melting material. The hot box and/or room should only be set to a maximum temperature of 60°C/140°F. Do not overheat, that may compromise product effectiveness and should be avoided. Refrain from multiple reheatings of product, this will also diminish the quality of the product.

SECTION 7: HANDLING AND STORAGE (cont)
GeLavish Gel Polish

Storage: Product is extremely light sensitive. If exposed to natural light or UV light, material will cure very quickly. Store in a cool, dry place, away from heat and all types of light. Store at temperatures below 100°F/38°C but above the product’s freezing point. If no freezing point is given, keep above 32°F/0°C at all times.

Explosion Hazard: High temperatures and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Local exhaust recommended to control exposure which may result from operations generating aerosols and hot operations generating vapors.

Personal Protective Equipment

General: To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE standard (29CFR1910.132) or European Standard EN166 be conducted before using this product. Provide eye wash stations and safety showers. Wear impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole body suit. Nitrile rubber is better than PVC.

Eye/Face Protection: Wear chemical splash goggles.

Skin Protection: Wear impervious gloves (Neoprene)

Respiratory Protection: A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain limited circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by nuisance level organic vapor dust masks can be used, however the use of the respirator is limited. Follow OSHA respirator regulations found in 29CFR1910.134 or European Standard EN149.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

SECTION 10: STABILITY AND REACTIVITY

Stability: Normally Stable

Hazardous Decomposition Products: Fumes produced when heated to decomposition may include: carbon monoxide, carbon dioxide

Conditions to Avoid: Storage >100°F/38°C, exposure to light, loss of polymerization inhibitor, contamination with incompatible materials.

Incompatibility (Materials to Avoid): Polymerization initiators including peroxides, strong oxidizing agents, copper alloys, carbon steel, iron, rust and strong bases.

Hazardous Polymerization: May occur-Uncontrolled polymerization may cause rapid evolution of heat and increased pressure that could result in violent rupture of sealed storage vessels or containers.

SECTION 11: TOXICOCLOGICAL INFORMATION

SECTION 13: DISPOSAL CONSIDERATIONS
Non-contaminated, properly inhibited product is not a RCRA hazardous waste. It is the generators responsibility to determine what is classified as a hazardous waste. Comply with all federal, state, and local regulations. Dispose of diking materials and absorbent in compliance with State, Local, and Federal Regulations. Residual vapors may explode on ignition; do not cut, drill, or weld on or near the container. Mix with compatible chemical which is less flammable and incinerate.

SECTION 15: REGULATORY INFORMATION

US Federal Regulations

Clean Air Act: HAP/ODS
This product contains the following hazardous air pollutants (HAP), as defined by the U.S. Clean Air Act:
• NONE
This product contains no ODS's

Clean Water Act: Priority Pollutant
This product contains the following chemicals listed under the U.S. Clean Water Act Priority Pollutant and Hazardous Substance List:
• Butyl Acetate, CAS# 123-86-4

FDA: Food Packaging Status
This product has not been cleared by the FDA for use in food packaging and / or other applications as an indirect food additive.

Occupational Safety and Health Act
This product is considered to be a hazardous chemical under the OSHA Hazard Communication Standard. It's hazards are:
• Immediate (acute) health hazard
• Delayed (chronic) health hazard
• Reactive hazard

RCRA
This product contains chemicals considered to be hazardous waste under RCRA (40 CFR 261):
• Ethyl Acetate CAS# 141-78-6, RCRA Code U112

SARA Title III: Section 302 (TPQ)
This product contains the following chemicals regulated under Sec. 302 as extremely hazardous substances that carry a TPQ:
• Ethyl Acetate, CAS# 141-78-6, RQ (lbs.):5000

SARA Title III: Section 302 (RQ)
This product contains no chemicals regulated under Section 304 as extremely hazardous chemical for emergency release notification ("CERCLA" List).

SARA Title III: Section 311-312
This product is considered hazardous under the OSHA Hazard Communication Standard and is regulated under Section 311-312 (40 CFR 370). Its hazards are:
• Immediate (acute) health hazard
GeLavish Gel Polish

• Delayed (chronic) health hazard
• Reactive hazard

SARA Title III: Section 313
This product contains the following chemicals which are subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR 372:
• Isopropyl Alcohol, CAS# 67-63-0

TSCA Section 8 (b): Inventory:
The product contains chemicals listed on the TSCA inventory or otherwise complies with TSCA premanufacture notification requirements. None of the chemicals listed have a SNUR under TSCA.

State Regulations

CA Right-to-Know Law: California No Significant Risk Rule:

European Community

GeLavish Gel Polish
• HAZARD SYMBOLS: Xi: Irritant
• RISK PHRASES: R22: Harmful if swallowed, R36/38: Irritating to eyes and skin R43: May cause sensitization by skin contact.
• SAFETY PHRASES: S18: Handle and open container with care, S24/25: avoid contact with skin and eyes, S36/37: Wear suitable protective clothing and gloves, S38: In case of insufficient ventilation, wear suitable respiratory equipment.

Labeling according to EC directives-1999/45/EC

SECTION 16: OTHER INFORMATION

EU Classes and Risk/Safety Phrases for Referenced Ingredients (See Section 3):

Hazard Symbol:
X-Irritants
F-Flammable

Risk Phrases:
R10-Flammable; R11-Highly Flammable; R36-Irritating to eyes; R43-May cause sensitization by skin contact; R66-Repeated exposure may cause skin dryness and cracking; R67-Vapors may cause drowsiness and dizziness; R36/37-Irritating to eyes, respiratory system and skin; R36/38-Irritating to eyes and skin

Safety Phrases:
S2-Keep out of reach of children; S3/7-Keep container tightly closed in a cool place; S7-Keep container tightly closed; S16 Keep away from sources of ignition-No smoking; S24/25-Avoid contact with skin and eyes; S26-In case of contact with eyes, rinse immediately with plenty of water and seek medical advice; S27 Take off immediately all contaminated clothing; S28-Take precautionary measures against static discharges; S35-This material and its container must be disposed of in a safe way; S36-Wear suitable protective clothing; S36/37-Wear suitable protective clothing and gloves; S62-If swallowed, do not induce vomiting: seek medical advise immediately and show this container or label.
